Size: L 220 X W 102 X H 67 mm

The most beautiful example of human inventions, the traditional hand thrown brick. Every brick made by this method is unique in texture and color as the shaping process involves throwing the clot of clay in a mold box flushed with fine sand, every clot of clay that strikes the mold does so in a slightly different way which leads to a different texture

for every brick. The particle size of the sand also leads to many different textures, the difference of humidity in the clay clots leads to different textures, a dynamic combination of all this leads to a product that is random, beautiful yet amazingly strong, crisp in shape and can be used to create structures for generations to come.

- *Sandy texture*
- *Earthy appeal*
- *Beautiful color variations*
- *Most preferred brick*

***Specifications:**

Weight: 2.6 Kg

Strength: Above 75 Kg/Cm²

Water absorption: < 12%

Coverage per sq.ft. (10mm joint):

4" Wall - 5.3 pcs.

9" Wall - 10.7 pcs.

1 m² - 56.5 pcs.

1 m³ - 504.2 pcs.

*Specifications are indicative, buyers are requested to undertake tests in accredited laboratories to verify suitability of bricks for particular application.

**Individual bricks may vary dimensionally this is natural characteristic of fired clay products and is catered for in relevant Indian Standard.

***Dimensions are subject to change without prior notice, before ordering/designing buyers are encouraged to inquire about prevailing sizes and quantities available.
